GRISHMA KHULAL THAPA

ASPIRING QA ENGINEER

PROFILE

Detail-oriented aspiring QA Engineer with hands-on experience in manual testing and foundational automation testing using Playwright and JavaScript. Experienced in functional and system testing, test case design, validation testing, bug identification, and end-to-end workflow testing through academic, personal, and freelance projects.

EDUCATION

DivyaGyan College 2023 - Present
Bachelor of Computer Application

Little Angel's College 2020 - 2022
+2(Science, Biology)

EXPERIENCE

Freelance QA Tester - Crop Management System

- Performed functional and system testing of a web-based Crop Management System.
- Designed and executed test cases for User Registration, User Login, Admin Login, Crop Management, Expense Management and Sales Management.
- Conducted positive and negative testing using valid, invalid, empty, and mismatched inputs.
- Tested CRUD operations for crops, expenses, and sales, including adding, editing, and deleting records.
- Verified validation messages, authentication, navigation, user workflows, and admin functionalities including blocking and unblocking user accounts.
- Compared expected and actual results and documented test outcomes and bugs/defects.

Freelance QA Tester - Skill Sharing System

- Designed and executed test cases for Learner, Teacher, and Admin workflows.
- Performed functional, validation, negative, authorization, session, and end-to-end testing.
- Tested role-based access control, including unauthorized dashboard access and URL/form manipulation attempts.
- Validated CRUD operations, file upload restrictions, certificate generation/revocation, personalized data visibility, and session handling.

PROJECTS

Complaint Management System

Tools: Manual Testing

- Performed manual testing of a web-based Complaint Management System.
- Tested core modules including Login, Logout, User Registration, Submit Complaint, Edit Profile, User Dashboard, Search & Filters, Admin Dashboard, View Complaints, Update Complaint Status, and User Notifications.
- Executed functional, UI, validation, and end-to-end workflow testing.
- Verified role-based access control and complaint lifecycle functionality.

SauceDemo Testing Project

Tools: Manual Testing, Playwright, JavaScript

- Designed and executed 19 manual test cases covering Login, Add to Cart, and Checkout modules.
- Performed positive and negative testing to validate application behavior.
- Automated critical user flows using Playwright including login, cart, and checkout processes.
- Verified UI elements, validation messages, navigation, and order placement.

DemoBlaze Testing Project

Tools: Manual Testing, Playwright, JavaScript

- Designed and executed 19 manual test cases covering Signup, Login, Add to Cart, and Place Order modules.
- Performed functional and validation testing across user workflows.
- Automated core scenarios using Playwright including authentication, cart, and purchase flow.
- Verified alerts, error messages, and successful order completion.

Skills

- SDLC & STLC
- Manual Testing
- API Testing (Postman)
- Test Case Writing
- Bug Reporting
- Jira
- Git
- Playwright
- Javascript
